A close-up, high-angle view of dark, roasted coffee beans scattered across a rustic wooden surface. The beans are irregularly shaped and have a rich, dark brown color with some lighter, almost white, spots where the outer layer has been broken or the bean is lighter. The wooden surface beneath them has a visible grain and some texture, suggesting it might be a cutting board or a table made of wood. The lighting is dramatic, coming from the side, which creates strong highlights on the rounded edges of the beans and deep shadows in the crevices, giving them a three-dimensional appearance. The overall composition is organic and suggests a natural, perhaps artisanal, source for the coffee.

Home

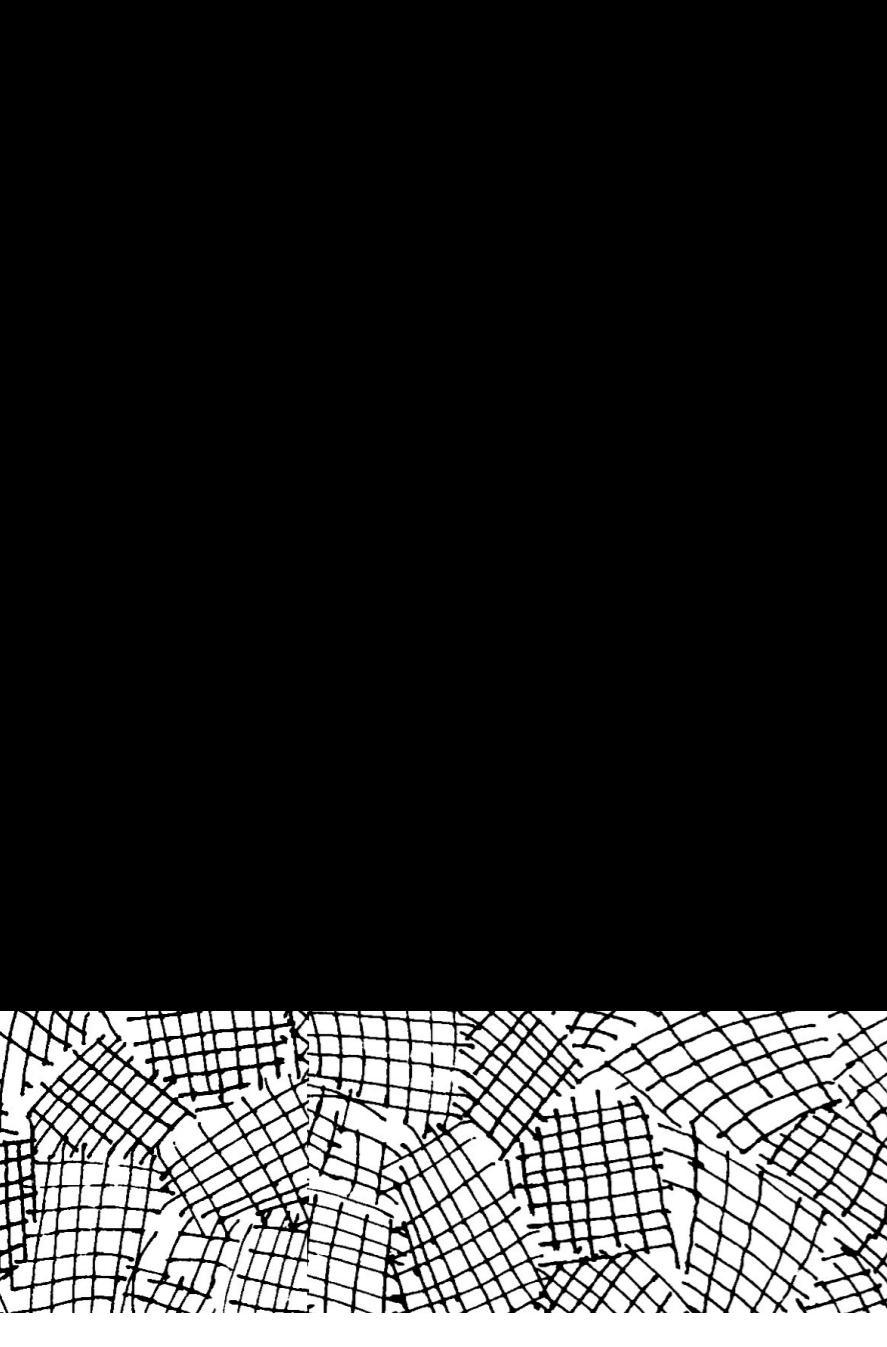

A close-up photograph showing two dark, oval-shaped artifacts resting on a surface with prominent horizontal grain or texture. The artifacts appear to be made of a reflective material, possibly metal, and have a slightly irregular shape. They are positioned side-by-side, with one slightly larger than the other. The background is out of focus, emphasizing the artifacts.
